

# The PROMISE Study

Peer group Research On Mentoring Scientists underrepresented in biomedical research

Seeking racially/ethnically underrepresented junior faculty and postdocs for a peer mentoring research study

You may qualify to participate in the PROMISE study if you **identify as**

- Black or African American
- Hispanic or Latinx
- South Asian
- American Indian or Alaska Native
- Native Indian or other Pacific Islander
- Multiracial

**And are involved in biomedical research**

(The investigation of biological/behavioral processes that advance the diagnoses, treatment, or prevention of disease)

#### Incentives:

- 2-hour peer group meetings (twice a month for 9 months) facilitated by senior underrepresented researchers
- Professional development and skills building to enhance scholarly output
- Compensation up to \$500

Join in this **national effort** with the National Institutes of Health (NIH) **to promote success of UR biomedical researchers in the workforce**
