Charles B. Hammond, MD Research Day Awards (2015-2013)

2015

Fellow First Place (tied)
Micael Lopez-Acevedo, MD
Incorporating sentinel lymph node biopsy into endometrial cancer staging surgery: incidence of lower extremity lymphedema (LEL) and effect on lower extremity function

Jason S. Yeh, MD
The effect of postpartum progestogen on cardiac function, NT-ProBNP, and inflammatory biomarkers in women with gestational hypertension

Resident First Prize
Joseph A. Dottino, MD, MPH
Improving NCCN guideline-adherent care for ovarian cancer: value of an intervention

Resident Second Prize
Diana M. Spahlinger, MD, MS (Resident Second Prize)
Selective cardiac surveillance in patients with gynecologic cancer undergoing treatment with pegylated liposomal doxorubicin (PLD)

Resident Third Prize
Kelly S. Acharya, MD (Resident Third Prize)
Ectopic pregnancy rate increases with the number of retrieved oocytes in autologous IVF with non-tubal infertility but not donor/recipient cycles: an analysis of 109,140 clinical pregnancies from the SART registry

Abstracts

Alexis A. Dieter, MD (Fellow)
Oral antibiotics to prevent postoperative urinary tract infection: a randomized controlled trial

Nevert Badreldin, MD, MS
Montelukast, a leukotriene receptor antagonist, inhibits spontaneous but not oxytocin-induced uterine contractions

Jeremy M. Belch, MD, MPH
Failure to receive desired postpartum sterilization and one year reproductive outcomes: Which patients are at highest risk for short interval pregnancy?

Emily M. Patel, MD (Fellow)
Follicular helper CD4+ T cell expansion after influenza vaccination in pregnant versus non-pregnant women

Sarah J. Dotson, MD, MPH
Safety and feasibility of contained uterine morcellation during laparoscopic hysterectomy

Carolynn M. Dude, MD, PhD
Predicting preterm delivery: using the MFMU BEARS trial data to optimize corticosteroid use in women at risk for preterm delivery
David F. Kappa, MD
Prevena incision management system versus standard of care: A comparison of short term cosmetic outcome in scar formation after cesarean section

Latoya C. Patterson, MD, MPH
Obstetrics and gynecology resident physicians recommendations for long acting reversible contraception in postpartum patients and possible elements of coercion: a survey study

Homa K. Ahmadzia, MD, MPH (Fellow)
Using antifibrinolytic drugs to prevent postpartum hemorrhage – is there concern for a hypercoaguable effect?

2014

Fellow First Prize
Ryan G. Steward, MD
Depot-medroxyprogesterone acetate increases resting metabolic rate in premenopausal women

Resident First Prize
Juan Sebastian Sandoval, MD
High peak estradiol/mature oocyte ratio predicts lower clinical pregnancy, ongoing pregnancy, and live birth rates in GnRH antagonist ICSI cycles

Resident Second Prize
Carmen M. Doom, MD, PhD
Quantitative and qualitative changes in cytomegalovirus cellular immunity during pregnancy

Resident Third Prize
Taylor B. Turner, MD, MS
CUL7 protein expression and TP53 status in epithelial ovarian cancer

2013

Fellow First Prize
Michael P. Smrtka, MD
Thrombin-induced inflammation in human decidual cells is not affected by heparin

Resident First Prize (tie)
Lisa N. Brunengraber, MD
Injectable clostridium histolyticum collagenase as a potential treatment for uterine fibroids

Paige J. Walter, MD, MBS
Perioperative anticholinergic medications and risk of failed void trial after urogynecologic surgery

Resident Second Prize
Jan S. Eperjesi, MD, MHSc
Determinants of response versus non-response to Spanish-language postpartum HCAHPS surveys: toward authentic patient engagement in obstetric quality assessment

Resident Third Prize
Cindy E. Zhang, MD
High peak estradiol predicts higher miscarriage and lower live birth rates in high-responders triggered with a gonadotropin releasing hormone agonist in IVF/ICSI cycles
